Chain 11 Lj to next junction of chains of previous round. DNR

Repeat from * round until you have completed 6 points and Lj to first chain made.

Finished cut and hide ends. .

Notes from the Designer

This snowflake is worked in front side Backside by default. You do not reverse work at any time.

This snowflake would be perfect to attach to a ornament ball as well.

This snowflake has a large center opening this could be the perfect frame for a small picture of your baby, children, grandchildren or pet.

I hope you enjoy all the possibilities to make this a personal snowflake for someone special or a gift.

Happy Tatting.

The Shade Tree Designer aka Harolahlala
