This pattern is suitable for shuttle or needle tatting.

+ joining picot	ds = double stitch
/ = separates number of stitches on each side of a set of stitches	LJ = lock join
Ch = chain	NS = node stitches
CR = close ring	p = picot
CWJ = Catherine Wheel Join	R = ring
DNRW = do not reverse work	RW = reverse work
	SLT = shoe lace trick
	vsp = very small picot

Materials required: 2 shuttles, Size 20 thread (2 contrasting colors). Motif measures approximately 1.5 inches long x 1 inch wide.

The outside chain is done in a node stitch (aka rick rack or Victorian set). A node stitch is the *first half of a double stitch repeated a number of times, followed by the second half repeated a number of times, completing one set (x/x)*. This is referred in the pattern as NS Ch.

Wind shuttle 1 with 2 yards and shuttle 2 with 2.5 yard.

Note: if you do not know how to do a CWJ, use a LJ instead. Regular ds or lock chain can be used instead of NS on the outside chains.

R 1 vsp 11 p 6 p 6 CR RW
 Ch 8 p 8 RW
 R 6 p 6 p 12, CR DNRW, SLT
 NS Ch 10 sets (2/2) RW
 R 18 + 18 CR RW (down join to p on chain between first two rings)
 NS Ch 10 sets (2/2)
 LJ to vsp on ring 1
 NS Ch 8 sets (2/2)
 CWJ to next p on ring 1
 NS Ch 4 sets (2/2) RW
 R 4 + 8 + 4 CR RW (join to last p on first ring and first p on second ring)
 NS Ch 4 sets (2/2)
 CWJ to 2nd p, second ring
 NS Ch 8 sets (2/2)

Cut, join to base of ring, hide ends.

NOTE: Use white and black thread for a penguin.
